

ÁLVARO RODRÍGUEZ SABORIT

Vila-real, Castellón, Spain | 640 724 326 | alvarodriguezsaborit@gmail.com

LinkedIn: www.linkedin.com/in/álvaro-rodríguez-saborit • Portfolio: alvarodriguezsaborit.it

PROFESSIONAL PROFILE

Computer Engineer specializing in full-stack development, with experience designing REST APIs, real-time computer vision systems, and production-ready generative AI integrations. Accustomed to solving unconventional technical problems, from geospatial processing to interactive audiovisual control systems.

EDUCATION

Universitat Jaume I

2020 - 2025

Bachelor's Degree in Computer Engineering, Software Engineering track

PROFESSIONAL EXPERIENCE

TineVerse - Full Stack Developer | Benicàssim, Castellón

Feb. 2025 - Apr. 2026

- Developed a REST API with Python and FastAPI to centralize and expose real-time status of ski slopes in Spain, with persistence in PostgreSQL and optimized SQL queries, implementing a web scraping system for automatic data extraction and updating.
- Built, with TypeScript, React, and Next.js, the audiovisual playback control system for an immersive 360° projection room, managing content playback from Disguise, YouTube videos, and live broadcasts.
- Implemented a real-time person detection and tracking system using YOLO, sending coordinates via OSC protocol to Notch to generate interactive visual effects, and designing the geometric mapping algorithm to transform 3D to 2D coordinates.
- Developed and maintained a web application for tracking marine data collected by buoys and sensors, integrating WMS/WMTS layers and representing information on an interactive 3D globe.

Porcelanosa Grupo - Programmer, Curricular Internship | Vila-real, Castellón

Sep. 2024 - Dec. 2024

- Developed, as a Final Degree Project, a web application for order management with generative AI integration to automate data extraction from invoices with heterogeneous formats, optimizing manual data entry in the internal system. The AI-integrated process was implemented into the company's actual workflows.

Heladería Horchatería La Murà - Waiter | Vila-real, Castellón

2018 - Present

- Balanced this position with university studies and professional internships, developing discipline, time management, and customer service skills.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C, C#

Frontend: React, Next.js, Vue

Backend / APIs: Nest, FastAPI, Spring Boot, REST APIs

Databases: PostgreSQL, MySQL, NoSQL, Firebase

Other: Git, Docker, Linux, Bash

LANGUAGES

Spanish and Catalan: Native

English: B2 (Cambridge Certificate)

INTERESTS

New technological trends, football, hiking, travel.
